

Guidelines Before You Visit

You're *always* welcome to come in and browse our showroom anytime. However, to help you maximize your visit, and to help us meet your expectations, we will need the following information. You may find it helpful to consult with your contractor and licensed plumber. Appointments are required for plan review. elegant@elegantdesignsshowroom.com

- Call or email us to **schedule an appointment**. Please allow at least 2 hours. Depending on the scope of your project, additional time may be needed.
- **Bring your plans and blueprints or home drawings and measurements**. We need these to ensure the selections we make will fit your space or if there are any special design restrictions.
- **If you're measuring your own existing space for a remodel project**, note the location of any windows and door openings. Please review the following whether your project is for a new home or a remodel:
 - **Bath**: Note the drain location in the tub and if the plumbing for the toilet & sink is from the wall or the floor.
 - **Water Supply System & Hot Water Source**: This is important because it affects your water pressure. Is it a well pump, water tower, or municipal supply? If you're on a municipal system, you can call your municipal supplier and ask for your static water pressure (given in psi). If you're on a well system, your plumber may be able to tell you the gallons per minute your well pump will draw.
 - **Kitchen Remodel**: Note your current faucet's location and current sink size.
- **Determine if there are any special personal needs** for consideration.
- **Are you working with a contractor?** If this is the case, please determine who will actually be buying the material.
- Know the name of your **builder or remodeler**, as well as your **plumber**. Have their phone numbers with you in case we need to communicate with them.
- **If this is new home construction**, bring a list of standards or allowances for the project.
- If you're working with a designer, we'll want to make our selections consistent with their themes and colors.
- **Bring any ideas or pictures from magazines** of rooms and/or products that appeal to you.
- **Bring any samples of** tile, flooring, fabrics, countertops, etc.
- Think about color and finish preferences for fixtures and faucets, as well as other decorative hardware.
- Make pre-arrangements for small children so that you can enjoy the experience of our showroom (with working displays) and allow yourself to focus during our time together.
- Please allow plenty of time for the selections, pricing, and ordering processes, especially as related to any non-stock items and/or custom orders.
- Visit our website to view our product line card and peruse our international portfolio of products, including exclusive and semi-exclusive lines not available elsewhere. Remember, Delaware has NO SALES TAX! www.elegantdesignsshowroom.com
